#### Colour Matching Notes:

These colour cross references are only intended as a guide to reproducing the Metamark colours. The above are only to be interpreted as to the nearest Pantone® reference and not intended as a direct match, and are based on the spot colour derivation of the Pantone®. Reproducing the colour using the above cmky references is dependent on the variability of the output device and inks, and the available colour gamut from the device. For example, certain oranges and greens are outside the colour gamut of a 4 colour printer. To achieve the correct colour always proof the final output colour and adjust the input file to compensate for variations.
